### Notice: If Shade Length is 3X More Than Width - Possible Tracking Problem

Roller shades that exceed a 3-to-1 length to width ratio, where the shade is more than 3 times longer than it is wide, may have problems tracking or rolling up straight. This tracking problem, commonly referred to as telescoping, is an inherent characteristic of roller shade fabrics and should be explained to your customer. We make every effort to 'fine tune' each shade, but shades with these dimensions are prone to this problem. **3X LENGTH TELESCOPING SHADES ARE NOT COVERED UNDER WARRANTY.**

## ROLLER SHADE TOP TREATMENT OPTIONS

### 3" & 4" Round Cassette System

For use with clutch operated or motorized roller shades only. This aluminum system with a round face, dust cover, and back panel fully encloses the shade. The Cassette System is available in **White, Black, Bronze** or **Anodized Aluminum** and comes standard with a matching fabric insert. Cassette can be ordered without insert. Available for inside or outside mount.

### 3" Square Cassette System

For use with clutch operated or motorized roller shades only. This is a square, flat front aluminum cassette, with an option for fabric insert. Inside and outside mount. Available in **White, Anodized Aluminum, Bronze**, and **Black**. 4" coming soon.

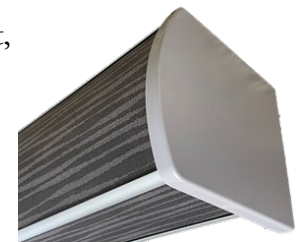

### 3" & 4" Fascia System

For use with clutch operated or motorized roller shades only. This is an L-shaped, flat front, aluminum fascia with a face and bottom only, available in **White, Black, Bronze** or **Anodized Aluminum** for inside or outside mount. There are some size restrictions due to the rollup diameter of certain shade materials.

### 4" Curved Fascia

For best use with motorized roller shades. This is an C-shaped, curved front, aluminum fascia with fabric insert (on face and bottom only), available in **White, Black, Bronze** or **Anodized Aluminum** for inside or outside mount. There are some size restrictions due to the rollup diameter of certain shade materials. **It is best used as an outside mount (OSM) top treatment. If installed inside mount (ISM), the end caps may need on-site modifications.**

## 4" & 7" Dual Shade Fascia System

For use with clutch operated or motorized roller Dual Shades only, this is an L-shaped, flat front aluminum fascia with face and bottom, available in **White, Black, Bronze** or **Anodized Aluminum** for inside and outside mount. There are some size restrictions due to the rollup diameter of certain shade materials.

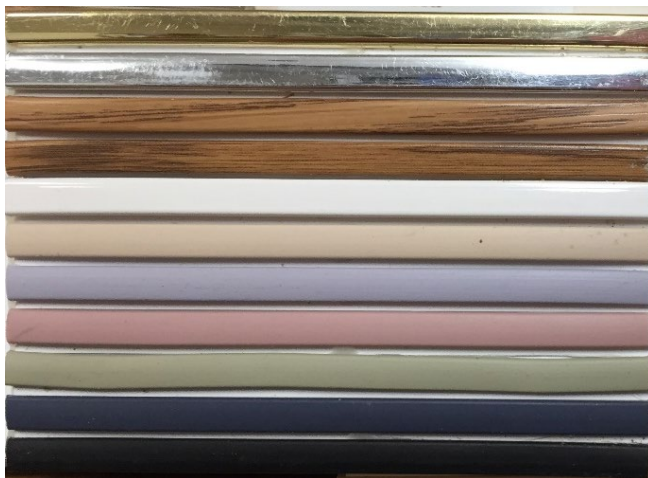

## Clear Edge Valance with Insert

Using a 3 1/2" Clear Edge valance, a 3 1/2" strip of matching Roller Shade fabric is inserted into the valance channel. This is for use with inside or outside mount roller shades and panel track systems. We can also fabricate the inserts only.

## Single & Double Decor Trim

For use with Roller Shades, Roman Shades, or Panel Tracks, these beautiful valances can be made into a single valance or two stacked valances with the choice of any fabric inserts to match any custom shade. Along with fabric insert, the decorative trim is customizable with our selection of ten different colors and patterns.

## ROLLER SHADES

Date: \_\_\_\_\_

To: \_\_\_\_\_

Sidemark: \_\_\_\_\_

### **IMPORTANT NOTICE**

The order for the above-referenced Sidemark contains a Roller Shade, or Roller Shades that are three times longer than their width.

Roller Shades that are at least three times longer than their width will tend to walk or telescope when rolled up. This can cause the shade to rub on the mounting brackets and fray. This may also cause the shade to roll up crooked.

This is the nature of the product and will happen regardless of the manufacturer. Telescoping is NOT a Warranty Issue.

Your client may need to guide the shade with their hand as it rolls up. Please inform your client of this situation.

Thank you!
