ROMAN SHADE SPECIFICATIONS

Size Considerations

Minimum Width: 20"

Maximum Width: 96" Varies on Fabric Width"

Minimum Length: 20"

Maximum Length: 108"

NOTE: Fabrics CANNOT be railroaded or seamed.

Control Options

- **Plastic Beaded Chain:** No Charge
- **Continuous Cord Loop:** No Charge
- **Concealed:** No Charge (Cord is Hidden behind Fabric). Recommended for OSM Only.

NOTE: Continuous Cord Loop Chain Will be Approximately 2/3 Length of the Shade

Stacking Considerations

Spearlining: Length of the shade determines where the top spline is placed. Splines are placed at even intervals from the bottom of the shade to the top.

There may be a smaller interval between the top spline and the headrail, typically for one shade this does not create a problem. However, if two shades of varying lengths are on the same wall the splines WILL NOT match.

NOTE: Roman Shades With the Same Length Will Be Spearlined.

NOTE: Heavier Weight Material Will Create More Bulk (Room Projection) When Raised.

Natural Weave Fabrics

Some natural weave fabrics can have variations in color, weave, and opening. Weave patterns may not be perfectly horizontal so horizontal lines across a window opening may not be level. This is not considered a defect.

Headrail Options

- **Standard Headrail (White Only):** No Charge

Hem Bar Options

- **Aluminum Fabric Wrapped:** No Charge
- **Sealed Hem Bar:** No Charge

Surcharges

- **Lining:** See Price Grid

NOTE: Lining is the Perfect Solution for Turning a Light Filtering Fabric Into a Room Darkening Fabric.

Top Treatment Options

- **Clear Edge Valance With Insert (ISM or OSM):** See Price Grid.
- **Flat Fabric Valance (ISM Only):** See Price Grid

ROMAN SHADE TOP TREATMENT OPTIONS

Clear Edge Valance with Insert

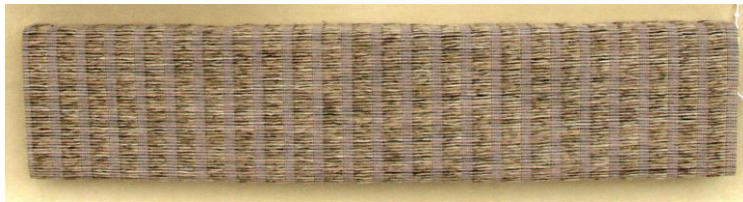

Using a 3 1/2" Clear Edge vertical blind valance, a 3 1/2" strip of shade cloth is laminated to aluminum to be inserted into the valance channel. This is recommended for Inside Mount (ISM) or Outside Mount (OSM) use. We can also fabricate the inserts only.
