Minimum Width: 20"

Maximum Width: 96"

Minimum Length: 36"

Maximum Length: 96"

NOTE: Fabrics CANNOT be railroaded or seamed.

Control Options

- **Metal Chain:** Standard (No Charge)
- **Continuous Cord Loop:** Comes with Child Safety Tension Device.
- **Concealed:** No Charge (Cord is Hidden behind Fabric). Recommended for OSM/Standard on Motorization.

NOTE: Continuous Cord Loop Chain Will be Approximately 2/3 Length of the Shade. Comes with Child Safety Tension Device.

Stacking Considerations

Spear lining: Length of the shade determines where the top spline is placed. Splines are placed at even intervals from the bottom of the shade to the top.

There may be a smaller interval between the top spline and the headrail, typically for one shade this does not create a problem. However, if two shades of varying lengths are on the same wall the splines WILL NOT match.

NOTE: Roman Shades with the Same Length Will Be Spear lined.

NOTE: Heavier Weight Material Will Create More Bulk (Room Projection) When Raised.

Natural Weave Fabrics

Some natural weave fabrics can have variations in color, weave, and opening. Weave patterns may not be perfectly horizontal so horizontal lines across a window opening may not be level. This is not considered a defect.

Headrail Options

- **Standard Headrail (White Only):** No Charge
