ZEBRA ROLLER SHADE SPECIFICATIONS

Standard Features & Specifications

HOME DECOR's Zebra Roller Shade is an innovative window blind that features two layers of translucent or opaque horizontal striped fabric. The front layer moves independently of the back, allowing the stripes to glide over each other creating an open and closed effect – with limitless light control.

A control chain, motor, or cordless operation is used to slide the opaque and translucent woven stripes past each other. This enables you to soften excess daylight and reduce the glare entering a room. Sliding the fabric into a closed 'opaque-opaque' position allows full privacy and an impressive block of beautiful fabric in your window.
