ZEBRA ROLLER SHADE SPECIFICATIONS

Standard Features

HOME DECOR's Zebra Roller Shade is an innovative window blind that features two layers of translucent or opaque horizontal striped fabric. The front layer moves independently of the back, allowing the stripes to glide over each other creating an open and closed effect – with limitless light control.

A single control chain is used to slide the opaque and translucent woven stripes past each other. The same chain is used to raise or lower the window blind to any height in the window with ease, the same way a classic roller shade would. This enables you to soften excess daylight and reduce the glare entering a room. Sliding the fabric into a closed 'opaque-opaque' position allows full privacy and an impressive block of beautiful fabric in your window.

EXPOSED FABRIC BOTTOM BAR: Certain fabrics require the use of a Bottom Bar where the fabric remains exposed as it transitions from front to back. The fabric is constructed in a way that prevents them from being used in the standard Zebra bottom bar and the shade will not function properly without the change. These fabrics have been identified in the charts throughout this guide. Please call customer service with any questions.

Zebra Shade Specifications

Standard Features

- 3" or 4" Fabric Wrapped Cassette
- Color Coordinating Metal Chain & Hem Bar
- Clutch Control
- Only Available on Regular Roll

Size Considerations

Minimum Width: 14"

Maximum Width: 108"

Maximum Length: 120"

Cassette

- Curved Designer Cassette, Fabric Wrapped to Coordinate with Shade Fabric.
- Cassette Size will Vary Based on Width and Length of Shade
- Two Shades in One Cassette is Available.

Control Options

- **Clutch Control Lift System:** No Charge
NOTE: Continuous Cord Loop Chain Will be Approximately 2/3 Length of the Shade

Standard Deductions

Zebra shades will be in the "closed" position when shade is lowered to the ordered height. Therefore, it is important to give the exact height of shade desired or the shortest window height.

Inside Mount

- When Ordered as Inside Mount, the Cassette End Cap to End Cap Measurement Will be 1/8" Less Than the Ordered Width.
- No Deductions on Ordered Height.

Outside Mount

- When Ordered as Outside Mount, the Cassette End Cap to End Cap Measurement Will be the Same as the Ordered Width.
- There will be no Deduction on the Ordered Height

Cloth Measurement

- When Ordered as Cloth Measurement, the Fabric will Measure the Ordered Width.
- The Cassette will Measure out Wider than the Cloth Measurement.
- No Deductions on Ordered Height
